

Review Report of the Requirements			
Requirement ID	Status	Feedback	Approval
REQ-1	Completed	<ul style="list-style-type: none"> • This feature is implemented successfully • Database table was created and successfully connected to frontend • All the courses are displayed in dropdown list • Administration can easily create a course with appropriate informations • The search bar could have been implemented instead of dropdown list for better user experience • The better course display could have been used. The website shows only the course name and id as of now. 	Approved
REQ-2	Completed	<ul style="list-style-type: none"> • Each note saved into an appropriate group of days for example monday, tuesday etc. • Students can edit and save their notes for the corresponding day. • The relationship has been established between each note and students that owns them. • Students can only have 1 note per day as of now • Note system could have been improved by allowing students to have multiple notes for each day instead of having 1. 	Approved
REQ-3	Completed	<ul style="list-style-type: none"> • Students should be able to drop courses if they have problems • The chat box includes the feature of seeking guidance from academic advisors • Students can only drop one course at a time • Dropping a course should have minimal effects for prerequisites for the upcoming years 	Approved

REQ-4	Completed	<ul style="list-style-type: none"> • Database for the user record (table) has been established • POST request is successfully handled in the backend • User's password has been encrypted for better security measures • 5 attempts will be added to each user account to ensure protection against brute-force attack. 	Approved
REQ-5	Work In Progress	<ul style="list-style-type: none"> • The notification systems alerts the students with the updated news • Notifications could have been linked on phone instead of using laptop and PCs • Different colors could have been used for different types of tasks such as assignment, quiz, test, etc. 	Not Approved
REQ-6	Completed	<ul style="list-style-type: none"> • A friendly icon could have been placed in order to make users have good experience with the chat box • The chat box includes all necessary • More selections could have been made in order to provide students a variety of choices 	Approved
REQ-7	Completed	<ul style="list-style-type: none"> • As mentioned in the REQ-4 user record has been setup in the database • Student can be easily registered to the database by Administration accounts • Instructions page could have been added to website for better user experience • Students credentials are being provided by academic advising by hand as of now • Email service could have been implemented to ensure students get their credentials by their email instead of by hand 	Approved
REQ-8	Work In Progress	<ul style="list-style-type: none"> • The design is simple making it user friendly for users • Some colors could have been incorporated to make the website look attractive 	Approved

REQ-9	Partially Completed (WIP)	<ul style="list-style-type: none"> • Chat box functionality has been setup • Text file has been generated to store every message in the chat box • Messages are reading from files to display to users • Each sent message is written into a text file. • Students are required to refresh the website in order to see new messages • Real time communication could have been implemented instead of reading and writing to file 	Approved
